

Muhammad Abdullah

Software Engineer | Full-Stack Developer | AI-Powered Web Applications

Islamabad, Pakistan | +92 337 9672148 | abdullah.khan.aa7@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

EDUCATION

FAST - National University of Computer and Emerging Sciences

Peshawar, Pakistan

Bachelor of Engineering in Software Engineering, CGPA: 3.12

Aug. 2022 – 2026

EXPERIENCE

Web Developer Intern

Jun. 2025 – Aug. 2025

Nexium (AI-Powered Software & Consulting)

Remote

- Developed and deployed an **AI-powered website** using **Next.js** with backend integration.
- Designed scalable data solutions using **PostgreSQL** and **MongoDB**.
- Automated backend workflows using **n8n** and **API orchestration**.
- Built reusable UI components with **ShadCN** and **Tailwind CSS**; deployed on **Vercel**.

Management Head – FAST Problem Solving Challenge (FPSC)

Sep. 2023 – Jun. 2024

FAST-NUCES Programming Society

Peshawar, Pakistan

- Led **end-to-end management** of a university-level competitive programming event.
- Coordinated with teams to ensure **smooth execution**, fair competition, and **real-time issue resolution**.

PROJECTS

Sage: AI-Powered Recruitment Platform (FYP) | *Django, JWT, LangChain, ChromaDB, spaCy, Whisper, gTTS*

- Built a **Django REST/MySQL** recruitment platform with candidate portal, HR dashboard, role-based workflows, and structured application records.
- Improved candidate and HR operations by implementing **JWT authentication**, **CV parsing**, job applications, **applicant tracking**, analytics, and kanban boards for hiring visibility.
- Automated assessments with **RAG**, **Ollama**, question banks, **backend scoring**, generated test caching, and status updates across candidate pipelines.
- Built **AI interview flow** with generated questions, **gTTS**, **Whisper STT**, answer scoring, video upload, and HR review storage for evaluation history.
- Enabled shortlisted candidates to proceed to **AI interviews** with automated screening, evaluation tracking, and status-based progression.

Time-Off Microservice | *NestJS, JavaScript, SQLite, TypeORM, Jest, Supertest*

- Built a **NestJS API** for **time-off requests**, leave approvals, refunds, and balance reads.
- Protected balance integrity with **local pre-checks**, **HCM realtime/batch sync**, **idempotency keys**, API-key/role guards, and **54 Jest/Supertest tests**.

Pitch Snap: AI-Powered Startup Pitch Generator | *Next.js, TypeScript, Supabase, n8n, Tailwind CSS, Vercel*

- Built a **Next.js App Router** pitch generator with protected routes and **editable Markdown**.
- Improved authentication and AI workflow reliability by integrating **Supabase magic links**, session handling, **n8n webhook** generation, toast feedback, and edit/regenerate controls.

ClickNBuild: Construction Bidding Platform | *Flask, Jinja2, SQLAlchemy, MySQL, Stripe, JavaScript*

- Built a **Flask/Jinja** bidding platform connecting clients, builders, and material vendors.
- Managed delivery and payments by adding **bid workflows**, completion confirmation, **Stripe Checkout**, reviews, payment tracking, and a vendor marketplace.

TECHNICAL SKILLS

Languages: C/C++, Python, Java, JavaScript, TypeScript, C#, PHP, HTML/CSS

Frameworks & Technologies: Next.js, React.js, Django, Flask, NestJS, RESTful APIs, React Native, OpenCV

AI & Data Tools: LangChain, ChromaDB, spaCy, Whisper, gTTS, Pandas, NumPy, Matplotlib, Hugging Face APIs

Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA, Android Studio, Ubuntu, Vercel, Google Colab, Jupyter, n8n

Databases: PostgreSQL, MongoDB, MySQL, SQLite

Certificates: [React Basics](#), AWS Cloud Technical Essentials
